

# Carbon Cub From LTM

The Carbon Cub is a compact, portable, plug and play mini hoist system.

It is suitable for a variety of lifting applications in theatre, broadcast, museum, sporting, worship and retail venues.

It is especially designed to raise and lower lights, scenic elements, projectors or banners.

The Cub is matt black with black lifting cables and weighs only 41Kg.

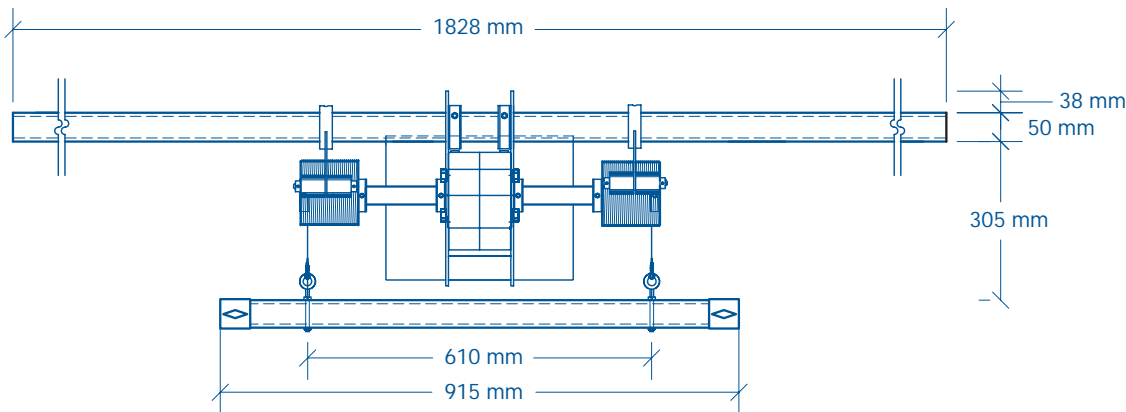

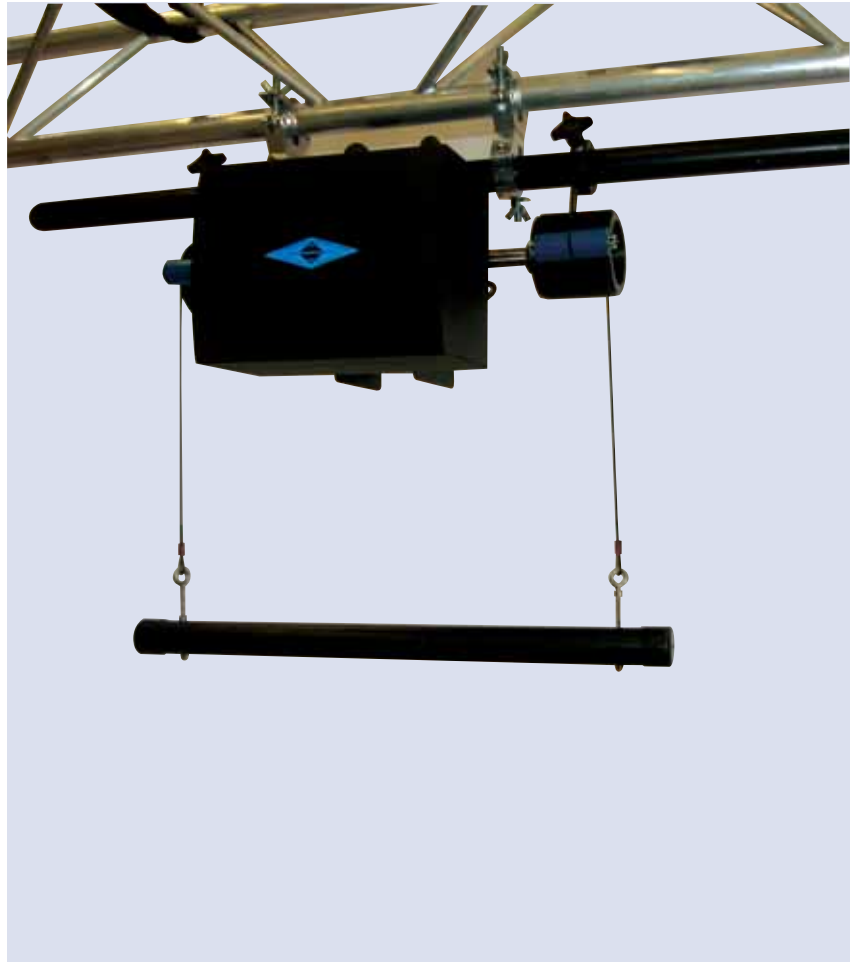

The cub's low profile maintains a 89 mm overhead clearance.

Individual or multiple hoists may be selected for simultaneous operation.

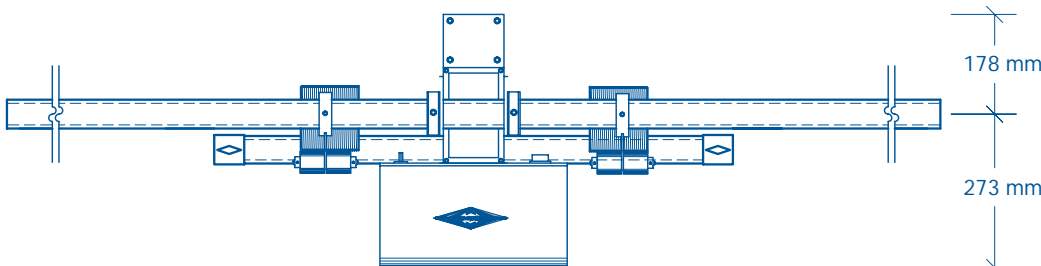

### Specification
